

Naval Hospital Pensacola Specialty Clinics Statement of Services

Otorhinolaryngology Clinic

Services

The Otorhinolaryngology Department provides inpatient and outpatient consultation relative to the examination, diagnosis, treatment, and appropriate disposition of patients with diseases or injuries of the head and neck. This service is provided to all eligible beneficiaries in all age groups. The Otorhinolaryngology Department is divided into the Otorhinolaryngology-Head and Neck Surgery Division and the Audiology Division.

The Otorhinolaryngology-Head and Neck Surgery Division provides:

1. Specialized evaluation and treatment of patients with disorders, diseases and injuries of the head and neck including all phases of Otology, Rhinology, Laryngology, and Facial Plastics and Reconstructive Surgery.
2. Bronchoscopic, esophagoscopy, laryngoscopic, nasopharyngoscopic examinations and treatment.
3. A full range of primary management of all types of maxillofacial fractures and trauma.
4. Evaluation, diagnosis and surgical management of head and neck neoplasms with the exception of vestibular schwannomas, skull base tumors, and reconstruction requiring microvascular free flaps.
5. Inter-service consultative services as needed.
6. Consultative support to the branch clinics of the military treatment facility and to other MTFs as requested.

Minor Procedures

Physicians may perform minor procedures using the assistance of a corpsman or a Registered Nurse. The provider is responsible for providing "informed consent" to the patient **PRIOR** to the procedure. Minor procedures are performed in the "minor procedure room" or provider's exam room.

Minor procedures include:

- Fine Needle Aspirate of masses
- I &D of abscesses
- Biopsies of skin/mucosal lesion
- Excision of minor growths, EIC's, skin lesions
- Laser/Cautery assisted Palatal procedures
- Control of epistaxis using cautery and packing

The Audiology Division provides:

1. Support to the Otorhinolaryngology service by performing audiometric evaluations of patients with hearing disorders.
2. Audiometric services include pure tone audiometry, speech reception threshold, speech discrimination testing, tympanometry and special site of lesion testing including tone decay, acoustic reflex and decay, ENG(IRO), visual reinforcement, canalith repositioning and non-organic testing.
3. Provides hearing aid evaluation and repairs to eligible individuals.
